SKILLS & COMPETENCIES

Database Management | Data Cleaning | Data Manipulation | Data Visualization | Machine Learning | Databricks | Delta Lake | PySpark | Unity Catalog | SQL (DDL, DQL, JOINS, CTEs) | Python (Pandas, Scikit-Learn, Plotly, Matplotlib, NumPy) | Tableau | Excel | Git | MySQL | PostgreSQL | MongoDB | SQLite | Google BigQuery

RELEVANT EXPERIENCE

Superstore Sales Analysis - Databricks

May 2026

Data Engineer (Independent Project)

Remote

- Built Bronze-Silver-Gold medallion pipeline on Databricks using Delta Lake and PySpark across 9,994 records.
- Organized data assets in Unity across catalogs, schemas and volumes for governed discoverability.
- Analyzed discount impact on profitability revealing high discounts universally result in net losses.

Global Layoffs Analysis

Dec. 2024

Data Analyst (Independent Project)

Remote

- Improved **data integrity** by **15%** through MySQL-based **cleaning** of 2,361 records—leveraging **CTEs**, **JOINS**, and Row Functions to **remove duplicates** reducing dataset to 1995 records.
- Used **core SQL operations** (CREATE, INSERT, UPDATE, DELETE) to restructure and optimize data tables for analysis.
- Applied **string and date functions** (TRIM, DISTINCT, LIKE, STRING_TO_DATE) to **standardize** formats and eliminate any data inconsistencies.

St. Louis Vacancy Collaborative - Data Working Group

May 2020 – Oct. 2022

Data Analyst (Volunteer)

Remote

- Collaborated with stakeholders (via Zoom) to **refine data points** and enhance the Vacant Property Explorer an online portal for **mapping over 20,000 vacant parcels** in St. Louis.
- **Enhanced interactive tools** like parcel details, statistical dashboards, and downloadable datasets **aligning functionalities with user needs**.

Rainfall Prediction

Oct. 2019

Data Analyst (Bootcamp Group Project)

St. Louis, MO

- Leveraged **Google BigQuery** to merge and clean weather data from multiple states, before narrowing **scope** to Missouri for our training and testing datasets.
- Utilized **SQLite** for **backend development** data storage and applied **machine learning** techniques (**multivariate linear regression** via **Scikit-Learn**) to predict rainfall, achieving **70% accuracy**.
- Delivered user-facing, machine learning via an **HTML**, **CSS**, **JavaScript** and **Flask frontend development** webpage, enabling **interactive model deployment** . .

EDUCATION & CERTIFICATIONS

University of Missouri-St. Louis

Dec. 2010

Bachelor of Science, Computer Science, Minor in Mathematics

St. Louis, MO

Washington University in St. Louis - Data Analytics Bootcamp

Oct. 2019

Certificate in Data Analytics

St. Louis, MO

INTERESTS

Urban Planning and Google Maps; Gardening and being outdoors; A good bowl of Banh Canh Cua.
